

MEDI ULTRA-LIFT

WHAT IS MEDI ULTRA-LIFT?

The treatment uses HIFU (High Intensity Focused Ultrasound), a medical procedure performed by a specialist with training completed and certified. HIFU is used to apply localised heat by use of ultrasound energy, resulting in exponential production of Collagen and Elastin, creating a lift in the treated area. It is considered the **Gold Standard of skin tightening technologies**. Medi Ultra Lift is a new type of non-surgical, non-invasive procedure which uses focused ultrasound, and the skin's own natural healing process to **lift, tone, and tighten loose skin on the brow, neck, under the chin, décolletage** (upper chest area), breast and full body. With Medi Ultra Lift you will avoid the uncomfortable feeling of surgery, the downtime, or the invasive use of foreign substances. Medi Ultra lift is a nonsurgical, safe treatment for skin lifting, and skin tightening for face and body.

WHAT TO EXPECT:

Based on clinical studies, the Medi Ultra Lift treatment works from the first session. Clients could see noticeable results when they walked out of the treatment room, further improving as time went on. The procedure is easily tolerated, and pain is minimal, as the HIFU technology gets delivered straight into the deep, structural tissues and muscles where collagen lives, bypassing the tender exterior skin surface. There's a cold gel that will be applied to your skin before the treatment to facilitate the process. For clients with super-sensitive skin, an anaesthetic cream can also be applied to make the treatment even more comfortable.

*Each session is dependent on the area being treated, but we advise around 30 minutes per area. Each client's treatment will be tailored to his or her individual requirements, which will be discussed in your pre-treatment consultation.

PRICING:

Prices starts at R 100 per HIFU shot

Each treatment is custom quoted per individual

*Starting from R 300 for frown between the eyes

MEDI ULTRA-FAT REMOVAL

LOOSE ONE DRESS SIZE in ONE TREATMENT - GUARANTEED(t's&C's)

Destroys fat permanently.

MEDI ULTRA Fat removal- and cellulite reduction therapy uses non-invasive, high-intensity focused ultrasound to permanently reduce targeted fat without surgery. Per example: The waistline reduction after just one treatment averages between 2.5cm and 4.5cm that typically means one or two dress or pant sizes. This after just ONE treatment!

*Each session is dependent on the area being treated, but we calculate A4 (10 shots)an area. Each client's treatment will be tailored to his or her individual requirements, which will be discussed in your pre-treatment consultation.

HOW DOES THE MEDI ULTRA TREATMENT REMOVE FAT CELLS?

When the Ultrasound hand piece is placed on the skin and switched on, your fat cells are gently blasted with HIFU energy. Eventually, the fat cells are moved to the liver, disposing of the blasted cells. Your fat cells are effectively removed by natural body processes; no trauma, no invasive treatment.

PATIENT FAQS

Q:What kind of results can I expect from MEDI ULTRA? A: On average, you can expect to lose one clothing size. Studies show an average waistline reduction of at least one inch. *Q:How long does the MEDI ULTRA procedure take?* a MEDI ULTRA treatment is completed in about one hour. You should consult your therapist to discuss treatment areas and time. *Q: How fast can I see results with MEDI ULTRA?* A: Most patients see maximum results in 8 to 12 weeks. This is the time it takes for the body to naturally remove fat cells that were destroyed during treatment. *Q:Is the MEDI ULTRA treatment safe?* A: You can have confidence in the science behind the MEDI ULTRA. The treatment has been extensively studied, with more than a decade of research and testing behind its development. *Q:Will I need to do anything after the MEDI ULTRA treatment?* A:You don't need to do anything out of the ordinary. There is no special post-care required, but we recommend that you maintain the same diet and active lifestyle before treatment - if not better!

NEEDLE-FREE LIP PLUMP & LINE FILLER

“NO PAIN, NO NEEDLES, NO INJECTIONS”

Transdermal pressure treatment technology is used to penetrate hyaluronic acid into the lips or skin. This revolutionary innovation allows practitioners to administer hyaluronic acid fillers without the use of the traditional hypodermic needle.

Ideal for those who feel uncomfortable or frightened of injections, this needle-free treatment allows everyone to reach their beauty goals without pain. The new process of having fillers is gentle and non-invasive compared to traditional methods.

WHAT IS HYALURONIC ACID

Hyaluronic acid is a substance that is created naturally in the body. It is categorized as an acid, but it is one of the world's most hydrating elements. High levels are found in soft connective tissue around our body. Hyaluronic acid holds moisture in the skin and makes skin plump and smooth

LIP AUGMENTATION

No needle fillers will plump and enhance lips without needles. The procedure will also smooth lines around lips. Hyaluronic pen treatments create the same effect as dermal fillers, but much less risky and painless. Hyaluron pen is a wonderful option, the procedure offers the same result as lip fillers and the procedure has a very low possibility of pain or bruising.

PROCEDURE

Over the years, our skin loses moisture and volume, and therefore, it becomes drier and thinner. Hyaluronic acid in the form of a clear serum gel is administered to aid in restoring volume to your lips and fill the lines around the mouth.

With the filler we can improve the overall shape and volume of the lips and correct any asymmetry as well as or fill the lines around the mouth

High quality hyaluronic acid gel is inserted into the Hyaluron Pen Pro air pressure device. The process then uses pressure to inject the Hyaluronic Acid up to the dermal layers of your skin. The process results in instant lip lift and plumpness.

Because we do not overfill to ensure a natural look A TOP-UP might be needed in 30 days (optional)

*After the procedure you may experience tenderness, swelling and slight itchiness, subsiding after a few days. Varying from patient to patient..

Results are immediately visible and should last up to 6 months.

PRICING:

Prices starts at R 100 per Hyaluronic shot

Each treatment is custom quoted per individual

*Lip fill - From R500

DERMAPLANING

WHAT IS DERMAPLANING ?

It is a process where a small blade/scalpel is used to remove the dead skin cells and those fuzzy little facial hairs, to create smooth and even skin. By removing these soft hairs, you will also have less oil build up. It also minimises the appearance of acne scars and reduces the appearance of fine lines.

WHAT DOES THE DERMAPLANING INVOLVE?

After cleansing, the skin is gently shaved, specifically the top part of the epidermis, with the scalpel using feather like strokes. This takes about 20 minutes.

WHAT WILL MY FACE LOOK LIKE AFTER DERMAPLANING?

Your skin looks instantly smoother with no downtime at all.

HOW DOES DERMAPLANING FEEL, IS IT PAINFUL?

Dermaplaning is a pain free experience. You will just feel the shaving sensation.

HOW OFTEN SHOULD I DO DERMAPLANING?

It is recommended to go for Dermaplaning on a monthly basis to maintain your smooth and even skin. At every treatment your therapist removes about 3 weeks' worth of dead skin cells, so returning every month promises a lifetime of healthy skin.
